Z-BIO IMS100

SOLVING A WORLD OF PROBLEMS THROUGH BIOTECHNOLOGY

DESCRIPTION

Z-BIO IMS100 is a unique biologically active formulation containing specialised bacterial strains and biodegradable cleaners.

APPLICATION

Z-BIO IMS100 is specifically designed for multi-surface cleaning and odour control.

Odour control applications include bathroom lines, toilets, urinals, sinks, showers as well as refuse disposal equipment, linen collection areas ...

Multi-surface applications include surfaces such as walls, tiled areas, floors, carpets and upholstery ...

On draining to the waste pipe and drain system it will degrade organic matter, in the sanitary pipe system, all the way

AREAS OF USE

- General cleaning** - Used as a normal cleaner for sinks, showers, floors, tiled walls, etc. Removes surface dirt and residual organics from pores of wood & concrete, tile grouting, pores of ceramics, between fibres, fixtures.
- Odours** - Can be sprayed, mopped or sponged to remove odours from bathrooms, urinals, floors, soiled carpet or fabric.
- Carpets** - Can be used to spot clean or shampoo carpets, curtains or laundry to remove deep organic stains such as food, wine, vomit, urine, etc. and the resultant odours. Degrades the organic matter such as urine & faeces, blood, food, sweat, soft drinks, milk.

ADVANTAGES

Z-BIO IMS100 3-WAY ACTION

- 1/ **Cleaning action** :
removes soils from surface & fibres
- 2/ **Immediate odour control**
nicely fragranced
- 3/ **Odour digester/long-term odour control**
removal of residual organics

- Unique liquid biological formulation replaces environmentally hazardous cleaners.
- Removes odours at source.
- Degrades and removes organics from surfaces ...
- Keeps drains, traps and pipelines clean and clear.
- Digests grease, oil, protein, fat, starch and other solid organic waste materials.
- Product requires no haz-chem labelling and is therefore safe in use, storage and transport.
- Is completely biodegradable thereby minimising any environmental impact.
- Can be diluted as appropriate thereby minimising cost in use.

DIRECTIONS FOR USE

General cleaning - Use diluted one glass (25 ml) to half a bucket of hand hot water (= 5 litres) for cleaning floors, showers, sinks, urinals, tiled areas etc.

Odours - Hand trigger spray a 50% solution with hand hot water into urinals, sinks, showers, toilets and leave wet.

Carpets :

- Spot clean : spray neat solution and then sponge with hand hot water to remove deep down stains in carpets, fabrics and laundry. The bacterial actions will digest deep down soil and stains and remove unpleasant odours.

- In case of odours coming from heavy soiled areas : milk, vomit, pet urine, blood, coffee, etc... remove as much solid as possible. Before using, test a small area of fabric for colour stability. Spray the area with neat product, take a sponge with plenty of water to brush and wet the area. Cover with a damp towel, let it work overnight and vacuum. Repeat the operation once more if odour persists.

- Carpet machine : Use as a normal cleaner in carpet shampoo equipment diluted 10 to 1.

Pipe cleaning - A nightly squirt into kitchen and bathroom sinks will keep drain pipes clean and clear of organic residual wastes and overcome unpleasant drain odours.

PACKAGING : 200 litre drums

Storage and Handling:

- Store in a cool dark place
- Avoid eye contact
- Do not ingest
- Wash hands thoroughly with warm soapy water after handling
